FOR IMMEDIATE RELEASE

**Adobe Selects I-Cubed as Gold Solution Partner**  
Recent Designation Builds on Series of Successes

Raleigh, NC, December 1, 2009 – Integrated Industrial Information, Inc. (I-Cubed), the Engineering Business Integration (EBI) company, is proud to announce the achievement of Gold Solution Partner, the highest designation in the Adobe® worldwide partner program.

Adobe's Solution Partner Program is designed for companies that provide solution-based sales, system integration, services or extended products based on Adobe technology. The relationship began when Adobe acquired Navisware FileLine from I-Cubed in 2006. FileLine is a Digital Rights Management (DRM) technology for computer aided design (CAD) and enterprise intelligence, which has been integrated into Adobe LiveCycle® Enterprise Suite 2.

"The partnership with Adobe enables I-Cubed to develop Rich Enterprise Applications (REA) with best-in-class development tools and is an important step in providing innovative user experiences for our customers," said Donald A. Thompson, Jr., President and Chief Executive Officer of I-Cubed.

I-Cubed is building on earlier successes with Adobe by launching SuppliPack™, an application for supply chain collaboration. SuppliPack automates the combination of 2D/3D CAD views, CAD models and supporting documentation into a single 3D PDF that is rights managed using Adobe LiveCycle Rights Management ES2 module.

SuppliPack is developed using Adobe's Flex® technology to provide a small footprint application that works in context of a CAD session to easily gather design assets from a variety of sources into a quickly assembled, lightweight design package. SuppliPack was awarded Honorable Mention at Adobe MAX 2009 in the category of Enterprise Productivity.
