**FOR IMMEDIATE RELEASE**

**I-Cubed President and CEO Named to Strategic Advisory Board at NC State University**  
Thompson to Offer Expertise to Well-Renowned Department of Computer Science

Raleigh, NC, January 30, 2009 – Integrated Industrial Information, Inc. (I-Cubed), the Engineering Business Integration (EBI) company, announced today that President and CEO Donald A. Thompson, Jr. has been named to the Strategic Advisory Board (SAB) of NC State University's Department of Computer Science (CSC). Thompson brings his extensive knowledge and background in enterprise software to the department as it grows moving forward.

"We are very happy to have Donald join the SAB," said Dr. Mladen Vouk, department head at NC State University's Department of Computer Science. "He and our Centennial Campus neighbor I-Cubed have long been strong supporters of our department. Donald joins a very strong group of leaders who are committed to providing guidance that is essential to our long-term strategic planning process."

The SAB is the cornerstone of the computer science department's strategic planning efforts and is comprised of premier leaders from business, technology and academia who bring in-depth expertise and knowledge to the department. The members are sought to provide input and guidance to help shape the department's focus and meet its long-term strategic goals. Thompson joins leaders from companies such as Google, NetApp and Red Hat.

"The Department of Computer Science is truly bringing innovation to academia through its collaborative interactions with other university departments and the greater Research Triangle technology community. I am excited to be a part of such a progressive program that is committed to helping its students be competitive and make positive contributions to society," said Thompson.

At I-Cubed, Thompson provides the strategic framework for delivering a portfolio of enterprise software and service solutions to a global customer base. Donald combines leadership, a drive for results and exceptional interpersonal skills to build profitable teams. This team concept has been validated at I-Cubed as a group of employee owners have expanded partnerships, satisfied customers, and doubled revenue during a challenging economic period. Donald serves on the NC State Computer Science Strategic Advisory Board, mentors emerging entrepreneurs and delivers leadership training seminars. Donald attended ECU on a football scholarship, studied finance and met his wife before leaving school to start his first company at age 19.
